

Municipality Success Story

The Incorporated Village of Freeport (IVOF) is located on Long Island in New York State. After Hurricane Sandy, this Long Island community received funding from the Governor's Office of Storm Recovery in 2017.

IVOF quickly became one of our most advanced customers. They have implemented the following mPower products in 2018: Integrator, OMS, Editor, AMI Listener, Predictor, and Web Capture. Freeport uses their OMS system as a disaster recovery system for all departments throughout the village, and mPower is pulling information from their RedAlert (Live Fire Department Data) as well as other enterprise software. mPower spent six weeks onsite training and implementing all the above software. The Village of Freeport is now able to independently use and maintain the mPower software.

The Village of Freeport progressed from non-distributed digital maps to a fully deployed and integrated web GIS and OMS system in a matter of twelve weeks.
