Customer Reference: City of Fulton, MO

In 2011, the City of Fulton implemented mPower Software Applications and Field Mapping Services. The City currently implements an advanced suite of smart grid hardware and software technologies including: AMI meters, meter data management software and cyber security applications. As a key component of this smart grid initiative, the City has implemented the following mPower solutions: Integrator, Editor, mPower OMS (Outage Management System), and mPower's Circuit Model Synchronization Tool.

mPower has helped the City of Fulton integrate their GIS with the City's MDM, AMI, Billing and AVL systems—efficiently and cost-effectively.
